## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 6,738,930. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

Claims 1 and 18 of the instant application discloses substantially the same limitations as claim 1 of U.S. patent' 930, except instead of an alarm card the instant application calls for a management appliance. Since an alarm card is used for alerting whence an abnormal condition occurs, it would have been obvious to one of ordinary skill in the art at the time the invention was made an alarm card can be used as a management appliance, i.e., managing/monitoring environmental condition.

Similarly, claims 2-6 of U.S. patent' 930 discloses substantially all the limitations of claims 2-5, 13-17, and 19-20 of the instant application; claims 8-13 of U.S. patent' 930 discloses substantially all the limitations of claims 6-11 of the instant application; and claim 16 of U.S. patent' 930 discloses substantially all the limitations of claim 12;
